

**REMARKS**

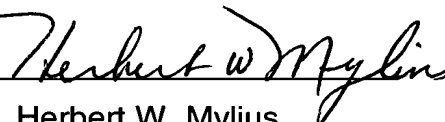

In the specification, paragraphs (0001), (0033), and (0038) have been amended to correct the identification of the parent application of the present case. Applicant regrets this typographical error which occurred upon filing.

Claims 1 - 39 are now present in this application. Original Claims 1-28 have been retained, and claims 29 - 39 have been newly presented. These claims are presented at this time to reflect the fact that the capillary lobe which forms a central aspect of the present invention may also take the form of a concave depression in the surface of the melting surface, into which depression a properly configured wick clip may fit to thereby create a capillary gap. Support for this amendment and this claim language may be found at page 13, lines 18 - 31 of the specification as filed (paragraph 0032).

Applicant respectfully requests entry of the above amendment, and that a timely Office Action and Notice of Allowance be issued in this case.

Respectfully submitted,

Paul E. Furner
